Sustainable Effluent Management

EFFLUENT DIESEL PUMP

The ultimate pumping solution, with a shredder on the intake port, these Nevada diesel pumps easily handle tough effluent.

Perfect for contractors and large effluent irrigation systems, these high capacity effluent pumps offer a semi-permanent solution when there's no tractor or electricity available.

Features

- Ferrari effluent chopper pump
- Iveco 126HP diesel engine
- Electronic control

POND STIRRING MADE EASY

Built with a sturdy base, allows for easy angle adjustment and full rotation to ensure optimum placement in the pond, all maintenance can be safely carried out onshore. All Nevada stirrers come with a Typhoon™ propeller.

There are six Nevada electric stirrer models available to suit most dairy effluent ponds, with power output ranging from 10-30hp.

While even the smallest model will get an entire average sized pond swirling, the larger models are powerful enough to handle larger ponds in excess of 5,000,000L.

7m Range Nevada EL7

Ideal for shallow ponds and steeper slopes.

\$13,250 +gst

ROVATTI PTO PUMPS

Perfect for contractors and farmers without electricity at the pump site, our effluent pumps are powered by your tractor for unbeatable mobility.

Ideal for high capacity effluent pumping or multiple pump sites, and equipped to handle even the toughest conditions, our PTO pumps are a must-have as a backup in case of power failures or pump breakdowns.

With maximum pumping performance, Nevada's range of high-capacity PTO pumps are made from hard-face lubricated mechanical steel.

Models

NEVADA FERTIGATOR™

Nevada Fertigators™ suit both small and large pumps, and can be used in conjunction with a traveling irrigator.

Features

- 10mm, 12mm, or 14mm nozzles minimise blockages.
- Gun constructed from metal.
- Up to 1500m² coverage (at 45psi).
- Common 2 inch camlock fittings.
- Wide 700mm diameter base for stability.
- 1 1/2 inch camlock connector for quick removal of gun from base.

Benefits

- Low application pods.
- Excellent for spreading effluent onto hillsides.
- Minimal maintenance.
- Can be used with both small and large pumps.

SET OF 4 UNITS
\$3,180_{+gst}

Additional tow kit sold separately for towing with ATV.

SPREAD LARGE VOLUMES FAST

We've got everything you need for operating the ultimate umbilical drag hose system. Equipment can be purchased individually or as part of a package deal.

RainWave™ 3PL Applicator

Nevada's RainWave™ 3PL applicator easily attaches to your tractor, providing a controlled, even spread. The RainWave™ produces larger droplets, meaning less wind drift and volatilisation for better nutrient absorption. This controlled application makes it ideal for spreading near boundaries or around irregular shaped paddocks.

Heavy Duty, Effluent Grade Layflat Drag Hose

Top quality PU and rubber lay flat hose is puncture resistant and stands up to rugged farm use.

- 102, 127 and 152mm diameter
- 3.3mm-4.0mm wall thickness
- 17bar max working pressure (250 PSI)
- 42bar burst pressure (610 PSI)
- 13,800 – 17,900 kg (in tonnes) tensile strength.

Hose Reeler

Both random wrap and segmented mounted umbilical hose reelers are available, and all are fitted with a heavy duty, 3 point linkage and a female Quick fit 'A' frame. When the male 'A' frame is located it is secured by two loose fitting pins.
